

Seeking a 19-week internship in Supply Chain

victor.feneis@gmail.com | +33 6 52 60 60 35 | <https://www.linkedin.com/in/victor-feneis-866265279/>

Profile

Engineering student at Mines Nancy (Industrial Engineering & Materials), interested in logistics and shopfloor process improvement. I enjoy mapping the as-is material flow, identifying risks that could impact quality, and turning observations into practical actions with production and logistics teams. Seeking a 6-month internship starting March/April 2026, motivated to learn Value Stream Mapping (VSM) and risk assessment

Education

- Mines Nancy (École nationale supérieure des mines de Nancy)** Sep 2024 – Present
· Engineering degree (Master's level) – Industrial Engineering & Materials
- ATS preparatory programme (post-technical degree bridge year)** Sep 2023 – May 2023
· Intensive year strengthening mathematics, physics and engineering sciences
- BTS (France) – Vehicle Maintenance, apprenticeship** Sep 2021 – Jun 2023
· 2-year post-secondary vocational diploma in vehicle maintenance (work-study apprenticeship), combining academic training and hands-on industry experience

Experience

- Stellantis – Belchamp Technical Center (France)** March 2024 – July 2024
· Engineering intern – Materials / Thermo-mechanical behavior (19 weeks)

Key responsibilities:

- Contributed to the development and analysis of a new automotive component, considering usage constraints and performance requirements
- Set up and monitored experimental tests (thermal and mechanical), instrumented test setups and analyzed results.
- Processed and summarized experimental data to support understanding of material behavior and technical decision-making

- 1st place – BMW France national apprentice mechanic competition** Apr 2023
· Assessment on electrical systems understanding, troubleshooting and mechanical fault diagnosis

- Automotive mechanic apprenticeship** Sept 2018 – Sept 2022
· Garage FENEIS, Sessenheim

Soft skills

- Impact-driven: focus on measurable results (time, quality, cost) rather than activity
- Analytical & evidence-based: challenge assumptions, use data and facts to support decisions
- Continuous improvement mindset: structured problem solving, pragmatic and action-oriented on the shopfloor
- Curious & fast learner: autonomous, quick to ramp up in new environments
- Ownership & reliability: organized follow-up, deliverables on time, attention to detail
- Teamwork & communication: comfortable working with operators and cross-functional teams

Technical skills

- Automotive project (buy/sell & repairs): opportunity assessment (diagnosis, repair cost estimate), intervention planning, budget/time tracking, compliance checks prior to resale
- Supply chain/Operations: flow management, inventory tracking (levels/follow-up), replenishment principles, production planning & management, inventory counts (principles)
- Continuous improvement (Lean manufacturing): Yellow Belt (in progress) – 5S, VSM, standards, problem solving
- Data analysis & performance tracking: advanced Excel (pivot tables, Solver, dashboards), Power BI (basic modeling, KPIs, dashboards), databases (relational model, simple queries)
- Automation/Programming: VBA (Excel macros), Python (data analysis & automation – basics)
- Business/Management : fundamentals in accounting and business economics

Languages

- French: native
- English: B2
- German: basic (A2)
